System Administration for TRANSFLO® and Workflow

June 23 - 25 or August 25-27 2009

This extremely popular three-day course will help you maximize your organization's TRANSFLO® investment. The experts at Pegasus TransTech will show you how to optimize your system, based on our experience, support calls and industry knowledge. This three-day course is for anyone who has just converted to 4.0, a recently hired administrator, newly implemented or upgraded to the new workflow or anyone who needs a refresher course in administrating the TRANSFLO® 2010 platform.

Tip, Tricks and Training for Gateway, Rendition Print and Express Indexing

May 19-21 or October 13-15 2009

This three-day course will show you how to expand the use of the three core components to the TRANSFLO® system, making the system work harder and your business units to work smarter. *Combine the flexibility of Gateway, Rendition Print and Express Indexing, and you have a powerful combination to solve your business needs and document flow challenges.* Combined, the three-day course will completely change the way you look at your TRANSFLO® solution.

Whether you currently use Express Indexing or have been considering implementing this solution, come learn more about how this powerful low touch solution can work best for your business needs. This part of the class will teach you how to optimize form identification to increase your read rate. Learn more about form generation and TeleForm Reader best practices. Get introduced or rediscover practices resulting in greater accuracy.

Gateway Tips and Tricks will provide expanded uses of your existing software, allowing you to do more! Learn how you can utilize the input and output queues within TRANSFLO® Gateway allowing for multiple sources of documents to be brought into the TRANSFLO® system and distributed back out to the enterprise.

Rendition Print template writing will provide an overview of TRANSFLO® Rendition Print Service module including configuration and maintenance tasks as well as most popular features and functions. You get hands-on experience and learn how to write or modify templates; you will receive sample scripts and best practices to carry home.

Before you book any travel, please contact your Project Manager to ensure availability, request additional information, pricing or to reserve a class. TRANSFLO® Customized or On-Site training is available upon request, please call for details.

Leveraging Your Investment - TRANSFLO® Integration
October 19 - 23 2009

Learn how to integrate applications and systems to TRANSFLO® during the five-day course. Whether you use COM, Java, web services, .Net assemblies or other, and whether you are integrating to a front-end application or a backend system, we can show best practices for each API and user controls. Also learn how to integrate to TRANSFLO document viewer controls and document manager API. Integration training will cover the following:

- TRANSFLO® Common Client COM
- TRANSFLO® Common Client .Net
- TRANSFLO® Web Services
- TRANSFLO® Document Manager COM
- TRANSFLO® Document Viewer Control

How to Design Effective Workflow Processes
July 20-24 or September 21-25 2009

The TRANSFLO® Workflow Studio training is a five-day, interactive and hands-on learning experience designed to provide participants with a detailed introduction to the TRANSFLO® Workflow Engine and Studio software. Course attendees will learn the basic concepts of Business Process Management and the fundamentals of constructing an automated business process. The course focus is on business processes and the definition of terms and concepts used during process design. The course explains the basics of TRANSFLO® Workflow Engine and the elements required in a production workflow environment including features used within the product to enable integration with other business systems. Course exercises provide practice creating procedures with component steps and forms. They provide participants with hands-on opportunity to create all of the basic components of an automated process.

Training is the cornerstone for developing a thorough understanding and working knowledge of TRANSFLO® - maximize your investment!

- ✓ Comprehensive curriculum in a structured classroom-learning environment with experienced Instructors.
- ✓ Practical, hands-on approach gives attendees a complete understanding of best practices for administering the TRANSFLO® 4.0 system.
- ✓ Tips and techniques for improving system reliability and quickly resolving problems. Get the most from the TRANSFLO® 4.0 system!
- ✓ Multiple attendee discounts!
