

ELD BY THE NUMBERS

STATS AND SAVINGS ABOUT ELECTRONIC LOGGING DEVICES (ELDs)

\$705
paperwork savings

By reducing paperwork, companies can save \$705 or more per driver each year. Across your whole fleet, that's powerful math! Here's the breakdown:

Annual Paperwork Savings per Driver ¹	
Elimination of Paper Log Books	\$42
Driver Submitting RODS	\$56
Clerk Filing RODS	\$120
Driver Filing RODS (record of duty status)	\$487
Total Savings per Driver	\$705

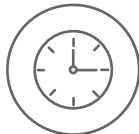

11.7%
fewer crashes

Trucks using ELDs have 11.7% fewer total crashes and 5.1% fewer preventable crashes⁴.

3.4
million drivers

The FMCSA estimates that 3.4 million commercial drivers are subject to this new rule⁵.

20
hours per driver

How much time do drivers save by moving from paper logs to electronic logs? Fewer and faster inspections as well as less paperwork can save 20 hours of driver time per year². That's 4.5 minutes of time saved per RODS!

1,500
gallons of diesel

1,500 gallons⁶ of diesel fuel are burned each year by idling a heavy-duty truck. Insights from ELD reporting can help you reclaim fuel lost to idling and operate more efficiently.

53%
lower violation rate

Trucks equipped with electronic HOS recorders have a 53% lower driving-related HOS violation rate and a 49% lower non-driving-related HOS violation rate than trucks without such devices³.
