# **1. Getting Started**

#### 1.1 Overview

This section describes the first steps in using the Surfsight Geotab Add-In within the Geotab marketplace.

## 1.2 Security

The following Geotab security restrictions effect provisioning and management of Surfsight cameras and events with the Surfsight plugin:

a. Only users with the security clearance true for "Admin Devices" can Add / Delete / Update cameras. All other users will not have the buttons "Add Camera", "Delete" and "Upgrade" available to them.

b. Only users with the security clearance true for "Administer Exception List" can edit Video Rules and Set Camera rules from the Geotab plugin. All other users will either have the applicable buttons not present and if pressing on the link for Video Rules, there will be text saying "Unauthorized Access"

#### 1.3 Adding a Dashcam to a Vehicle

This section will describe the steps needed to assign a Surfsight dashcam to a Vehicle defined in the Geotab platform.

**Prerequisite:** The Geotab vehicle needs to be defined in the Geotab system and the Surfsight dashcam needs to be installed.

1. Open the Surfsight menu and click on the Vehicles items

>	Groups filter	▼All Support Surf	0 Notifications	niv@surfsolutions.com
۹	Add Vehicle			
⑦ ()	Vehicles			
	Mike - 35766010100	00180	Camera Rules	Delete Camera

## 1.4 Viewing Live Video

Once a dashcam has been added, you can click on the Video button to view the front and rear cameras in real time.

Note: The Surfsight dashcams need to be online to view live video

# 2. Configuring Video Events

#### 2.1 Overview

The Surfsight Geotab AddIn allows you to configure the Surfsight events as well as Geotab exception custom rules as video rules.

When an event is set as a video event, the video of both front and rear cameras is automatically uploaded to the cloud service and will be available for viewing.

### 2.2 Configuring Dashcam Video Rules

Clicking on the Video Rules button next to each vehicle associated with a camera will provide a screen for provisioning the rules on the camera.

The vehicle size needs to be set in this screen, and each individual video rule in the camera can be set.

Note: By default all video rules are off for newly provisioned cameras in the Geotab plugin

#### 2.3 Configuring Geotab Video Rules

Video Rules are available for Exceptions and Custom Rules that are enabled in the Geotab system. To set video rules, click on the video rules button within the Surfsight Add-In menu. You will then be able to set each Video Rule and click the Save button to save your settings.

### 2.4 Viewing Video Rules Videos

1. To view video exceptions, click on the Video Events tab in the Geotab Add-In

3. Click on the Play button to view the video event. Note that both Geotab video events as well as provisioned Surfsight events will be provided in the list of events.

## 3. Viewing Video Recordings

#### 3.1 Overview

Using the Surfsight Geotab Add-In, recordings from Surfsight devices can be viewed directly in the Geotab platform.

#### 3.2 Viewing Recordings

To view recordings from the Geotab platform follow the following steps:

Note: The Surfsight dashcam needs to be online to download recordings

1. Click on the Recordings item in the Surfsight Add-In
